Yasmine khaled

Laravel Backend Developer

Cairo, Egypt | Phone: +20 1117035734 | yasminkhaled32003@gmail.com |
LinkedIn: linkedin.com/in/yasmine-khaled

Summary

Detail-oriented backend developer with solid experience in Laravel and PHP. Strong problem-solving background gained through competitive programming contests. Skilled in building reliable web applications and APIs, with a track record of working effectively in team environments. Open to opportunities as a freelancer or within a company.

Education

Ain Shams University – Cairo, Egypt SEP 2020 – JUNE 2024

- Bachelor of Computer Science; Scientific Computing Department.
- Graduation Project: Driver Safety System – Developed a multi-model deep learning solution to detect drowsiness, distraction, and emotions in drivers. **Grade: A**

Instant |Full Stack Diploma – Cairo, Egypt SEP 2022 – SEP 2023

- Completed an intensive Full Stack Development Diploma covering front-end and back-end technologies, including HTML, CSS, Bootstrap, JavaScript, jQuery, Angular, MySQL, PHP, and Laravel.
- Built and deployed multiple web development projects, applying best practices in responsive design, database management, and MVC architecture.
- Collaborated on team-based projects, enhancing communication and project management abilities. • [Certificate]

Work Experience

Back-End Developer | Freelancer| 911 Digital April 2025 – Current

- Developed and maintained web applications using Laravel and PHP.
- Designed and optimized databases for performance and scalability.
- Built and integrated RESTful APIs for seamless communication between systems.
- Collaborated with front-end developers and designers to deliver complete solutions.
- Troubleshot and resolved bugs, ensuring smooth application performance.
- Managed project timelines independently while delivering high-quality code.

Machine learning engineer intern | Cellula technologies SEP 2023 – Oct 2023

- Developed and deployed two machine learning projects — one individually and one as team leader.
- Deployed the first project using Flask and the second using Django and created user-friendly websites to present the deployed models.
- Led the team through the full process, including data preprocessing, model integration, and deployment.

Ain Shams University | Web development (front end) Workshop   Jun 2021 – Aug 2021
- Completed summer training in the fundamentals of web development (HTML, CSS, JavaScript).
- Gained hands-on experience in front-end design, responsive layouts, and browser compatibility.
- Worked on a team project to develop a fully functional movies website.
- Applied practical skills in structuring pages, styling components, and implementing interactivity.

Skills

- **Technical Languages:** PHP (Laravel), SQL
- **Technologies & Tools:** Git, GitHub, RESTful APIs
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, Problem Solving, Database Design and Management
- **Soft Skills:** Leadership, Time Management, Attention to Detail, Effective Communication

Projects

[911 – Website](#) | 911 Digital
- Built and maintained the backend of 911 Digital's website using Laravel and PHP.
- Designed and managed the database structure to support scalable content management.
- Developed and integrated RESTful APIs for seamless data flow between website modules.
- Implemented secure user authentication and role-based access control.
- Ensured smooth collaboration with front-end developers to deliver a responsive, fully functional website.

[Nature way – Website](#) | Freelance
- Developed and maintained the backend of **Nature Way's website** using Laravel and PHP.
- Designed and optimized database structures to ensure efficient data management.
- Built and integrated APIs to connect the website with dynamic content and third-party services.
- Implemented secure authentication, authorization, and role management features.
- Collaborated with front-end developers to deliver a smooth and fully functional user experience.

[Company Database Management System](#) | Instant
- Designed and developed a web-based Company Database Management System (DBMS).
- Built using HTML, CSS, JavaScript, PHP, and MySQL for efficient data handling.
- Managed core modules for Admins, Employees, and Departments with secure access controls.
- Enabled seamless data entry, updates, and retrieval to streamline company operations.
